PROFESSIONAL SUMMARY

Frontend Software Engineer with 2+ years of experience turning Figma designs into responsive, production-ready UI across React.js and Laravel/Blade. Have owned frontend development across seven+ live systems including hospital management, HR & payroll, EMR, hotel management, and e-commerce platforms with hands-on backend experience in PHP, MySQL, and RESTful APIs. Currently expanding into full-stack and applied ML, building an AI-powered productivity analytics platform (Laravel + Python/Flask). Looking to grow into a broader full-stack or senior frontend role.

EDUCATION

BSc (Hons) in Software Engineering — First Class 2026
University of Bedfordshire (delivered via SLIIT City Uni)

HND in Software Engineering 2023 – 2024
NIBM | Coventry University

Diplomain Software Engineering — GPA 3.65 2022 – 2023
NIBM | Coventry University

G.C.E.Ordinary Level Examination 2019
Carey College, Colombo 8

WORK EXPERIENCE

AssociateSoftware Engineer December 2024 – Present
Gate One Soft

Own frontend architecture and implementation across the company's client portfolio, translating Figma mockups into production UI using React.js and Laravel/Blade. Shipped and maintain interfaces for 5+ enterprise systems — Hospital Management, HR & Payroll, EMR, Hotel Management, and Master Data Management — supporting live client operations. Took initiative on backend tasks (PHP, MySQL) beyond the standard frontend scope, including payroll calculation logic and watermark/access-control features tied to system-level settings.

Intern—Frontend Developer June 2024 – December 2024
Gate One Soft

Started out building web pages and applying design implementations under senior guidance, working alongside the team on live client work. Performance during this period led to a promotion into the Associate Software Engineer role within 6 months.

SKILLS

- HTML, CSS, JS, React.js, Laravel/Blade, Responsive Web
- Design Mobile App Development – Flutter, Dart
- PHP, MySQL, Python (Flask), RESTful API Integration
- Applied Machine Learning / AI Integration
- Visual Studio Code, Git, Jira
- UI/UX Design and Prototyping (Figma)
- Client-Facing Requirement Gathering
- Team Collaboration & Communication

PROJECTS

PERSONAL & AI PROJECTS

ProdTrack AI
Laravel • MySQL • PHP • Python (Flask) • Machine Learning

AI-powered task management and productivity analytics platform. Connected a Laravel/MySQL backend to a Python Flask ML service for predictive analytics, including an Excel import module with fuzzy column mapping, batch ML predictions, and Chart.js-driven analytics dashboards.

Synergy One — E-Commerce Platform
Laravel • PHP • MySQL • JavaScript

Multi-page e-commerce website for a Sri Lankan organic fertilizer company with Sinhala language support. Managed project requirements with the client and developed the website, admin panel, product management, and stock management system.

Private Movie Theatre Booking System
Laravel • PHP • MySQL • JavaScript

A web-based system for browsing movies and showtimes, selecting seats, and making bookings. Includes an admin panel for managing movies, showtimes, bookings, and customers.

CLIENT & ENTERPRISE PROJECTS — GATE ONE SOFT

GateOneHR Mobile App
Flutter • Dart • UI/UX
Designed and developed responsive mobile app interfaces for employee management and HR-related workflows.

Hotel Management System
Laravel
Built booking, room, and admin management interfaces with branch- and availability-aware logic.

HR and Payroll System
Laravel
Developed employee management, attendance, and payroll modules; contributed backend logic for payroll calculations.

EMR System
Laravel
Built electronic medical record features for hospitals and clinics.

Master Data Management System
Laravel
Implemented data entry, validation, and management features for organizational data.

GateOneSoft Website
HTML • CSS • Tailwind CSS • PHP
Built frontend interfaces and responsive design for the company website.

GateOneSoft SaaS Website
React.js • Tailwind CSS
Built frontend interfaces and responsive design for the SaaS website.

LMS Mobile App
Flutter • Dart • UI/UX
Designed and developed the mobile app interface for an LMS platform, including course content, lessons, student access, and examination-related screens.

LMS Website
React.js • JavaScript • CSS
Designed and developed a responsive LMS website using React.js, covering course browsing, free content, authentication, and student-facing interfaces.
